

# Welcome to this session: Setting up your Development Environment and Introduction to HTML

**The session will start shortly...**

Questions? Drop them in the chat.  
We'll have dedicated moderators  
answering questions.

# Safeguarding & Welfare

We are committed to all our students and staff feeling safe and happy; we want to make sure there is always someone you can turn to if you are worried about anything.

If you are feeling upset or unsafe, are worried about a friend, student or family member, or you feel like something isn't right, speak to our safeguarding team:

Ian Wyles  
Designated Safeguarding  
Lead

Simone Botes

Rafiq Manan

Charlotte Witcher

Nurhaan Snyman

Ronald Munodawafa

Tevin Pitts

# Skills Bootcamp Full Stack Web Development

---

- The use of disrespectful language is prohibited in the questions, this is a supportive, learning environment for all - please engage accordingly. **(Fundamental British Values: Mutual Respect and Tolerance)**
- No question is daft or silly - **ask them!**
- There are **Q&A sessions** midway and at the end of the session, should you wish to ask any follow-up questions. Moderators are going to be answering questions as the session progresses as well.
- If you have any questions outside of this lecture, or that are not answered during this lecture, please do submit these for upcoming Academic Sessions. You can submit these questions here: **Questions**

# Skills Bootcamp Full Stack Web Development

---

- For all **non-academic questions**, please submit a query:  
**[www.hyperiondev.com/support](https://www.hyperiondev.com/support)**
- **Report a safeguarding incident:** **[www.hyperiondev.com/safeguardreporting](https://www.hyperiondev.com/safeguardreporting)**
- We would love your feedback on lectures: Feedback on Lectures

## Learning Outcomes

---

# Lecture Overview

---

- Code Editors
- Local Development Server
- The Terminal
- Basics of HTML

# Terminal

- ❖ A **terminal**, also known as a **command-line interface** or **shell**, is a text-based interface used to communicate with the operating system.
- ❖ It allows users to execute commands by typing them in, instead of relying solely on a graphical user interface (GUI).
- ❖ This is particularly powerful for automation, scripting, and system administration tasks.

# Terminal Commands: PWD

- ❖ Stands for "print working directory."
- ❖ It shows you the current directory you're in.

```
● PS E:\practical> pwd
```

```
○ Path
```

```
----
```

```
E:\practical
```

# Terminal Commands: LS

- ❖ Lists the files and directories in the current directory.

```
PS E:\practical> ls
```

```
Directory: E:\practical
```

Mode	LastWriteTime		Length	Name
----	-----		-----	----
d----	2/22/2024	5:24 PM		Tutorial session
-a----	2/20/2024	1:32 AM	16	example.txt
-a----	2/20/2024	1:13 AM	68	example1.txt
-a----	2/20/2024	1:14 AM	68	example2.txt
-a----	2/19/2024	11:13 PM	683	fileIO.py
-a----	2/22/2024	5:46 PM	3876	oop.py
-a----	3/1/2024	1:45 AM	1971	sandbox.py

# Terminal Commands: CD

- ❖ Stands for "change directory."
- ❖ It allows you to navigate between directories.

```
● PS E:\practical> cd tutorial_session  
○ PS E:\practical\tutorial_session> |
```

# Setting Up Dev Environments

- ❖ **VS Code:** <https://code.visualstudio.com/>
- ❖ **Browsers:**
  - Firefox
  - Chrome
  - Edge
  - Safari

# HTML

- ❖ **HTML (HyperText Markup Language)** is used to structure and format the content of websites on the World Wide Web.
- ❖ In simple words, HTML is the primary building block to create and structure website content.
- ❖ Web Developers use it to create a skeleton of modern websites and web apps.

# HTML

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Hello CoGrammar</title>
  </head>
  <body></body>
</html>
```

# HTML

- ❖ **<html>** is the root element of the DOM, and it contains all of the other elements in the code.
- ❖ The **<head>** tag contains metadata about the web page, such as the title and any linked CSS or JavaScript files.
- ❖ The **<body>** tag contains the main content of the web page, which will be displayed in the web browser's window.

# HTML: DOM

- ❖ The **Document Object Model (DOM)** is a programming interface for web documents. It represents the page so programs can change the document structure, style, and content dynamically.
- ❖ The DOM is a fundamental concept in web development, enabling interaction with web pages.
- ❖ When a web page is loaded, the browser creates a Document Object Model of the page.
- ❖ The DOM tree represents the structure of an HTML document. Each element in the document is a node in the tree, forming a parent-child relationship.

# HTML: Elements

- ❖ HTML elements consist of several parts, including the **opening and closing tags**, the **content**, and the **attributes**.
- ❖ The **opening tag** consists of the element name, wrapped in angle brackets (< or />). It indicates the start of the element and the point at which the element's effect begins.

# HTML: Elements

- ❖ The **closing tag** is the same as the opening tag, but with a forward slash ( / ) before the element name. It indicates the end of the element and the point at which the element's effect stops.
- ❖ The **content** of the element can be text, other elements, or a combination of both.
- ❖ The opening tag, the closing tag, and the content together make up the element.

# HTML: Attributes

- ❖ HTML elements can have **attributes**, which provide additional information about the element.

```
<p name="new_paragraph">Hi, I am a paragraph.</p>  
</body>  
</html>
```

# HTML: Paragraphs

- ❖ The HTML `<p>` tag is used to create paragraphs.

```
<body>  
  <p>Hi, I am a paragraph.</p>  
</body>  
</html>
```

Hi, I am a paragraph.

# HTML: Headings

- ❖ The HTML heading tags (<h1> to <h6>) are used to add headings to a webpage.

```
<h1>Heading 1.</h1>
```

```
<h2>Heading 2.</h2>
```

```
<h3>Heading 3.</h3>
```

```
<h4>Heading 4.</h4>
```

```
<h5>Heading 5.</h5>
```

```
<h6>Heading 6.</h6>
```

**Heading 1.**

**Heading 2.**

**Heading 3.**

**Heading 4.**

**Heading 5.**

**Heading 6.**

# HTML: Comments

- ❖ HTML comments are used to insert notes to a web page.

```
<!-- You can't see me -->
<p>
  You cannot see the comment above because it's not supposed to be visible
</p>
</body>
```

Hi, I am a paragraph.

You cannot see the comment above because it's not supposed to be visible

# Thank you for attending

**CoGrammar**
